

# How To Make Toilet Fizzies

*Designed by @marandas\_world*

## **Supplies Needed:**

- 1 cup Baking soda,
- 1 tablespoon Castille soap,
- 1/4 cup Citric acid,
- Dried lavender, and
- Silicone molds

1. In a container you want to mix baking soda and citric acid
2. Slowly add and mix in the castille soap
3. Mix in the dried lavender
4. Add the mixture to your silicone molds. NOTE: they will increase in size so don't fill to the top (want to allow room to expand)
5. Let dry in mold for at least 24 hours and then pop out of mold
6. Store fizzies in a glass container.
